

建築資訊模型在 軌道運輸工程設計之應用

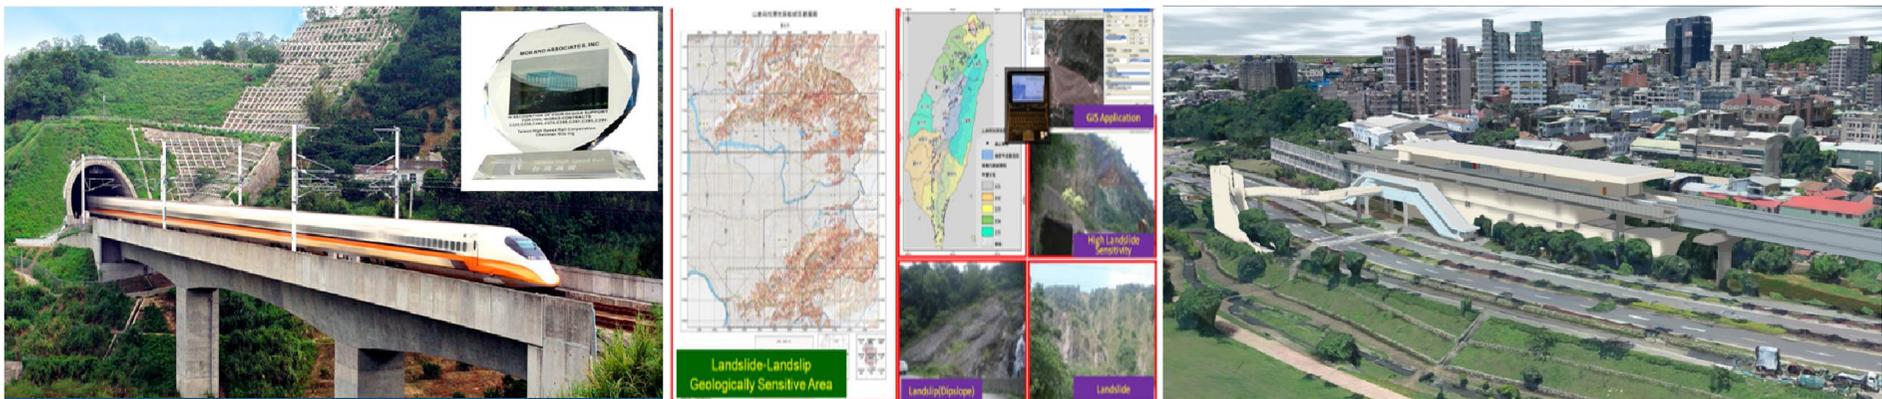

BIM MGMT. & ENGT. Integration Center

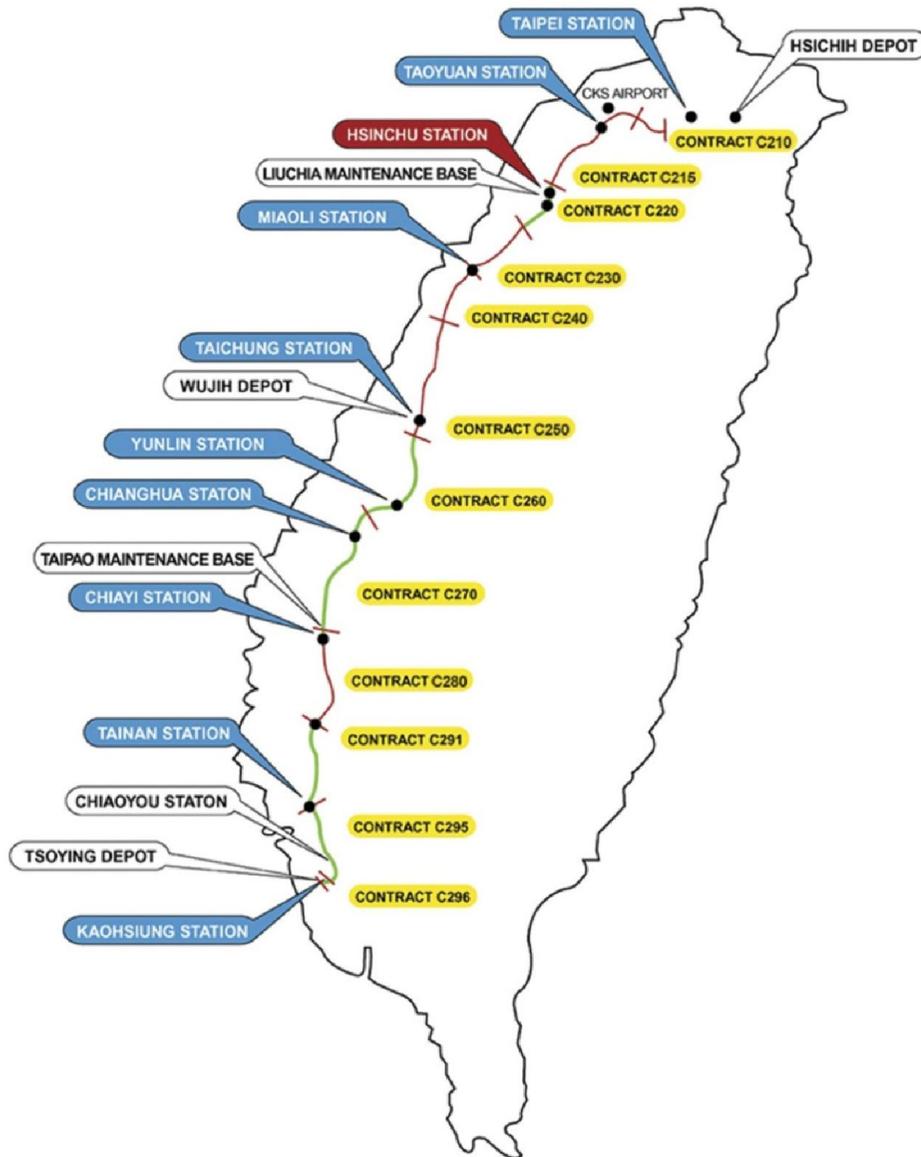

游中榮

- ❖ 學歷：中央大學應用地質研究所碩士
- ❖ 經歷：亞新公司大地工程及資訊部技術經理
中華民國大地工程技師公會理事
- ❖ 現職：亞新公司BIM中心經理
- ❖ 專長項目：大地工程、工程地質、地理資訊系統
MCSE、MCDBA

Taiwan High Speed Rail

Scope of Services:

For Government

- Feasibility Study and Preliminary Design

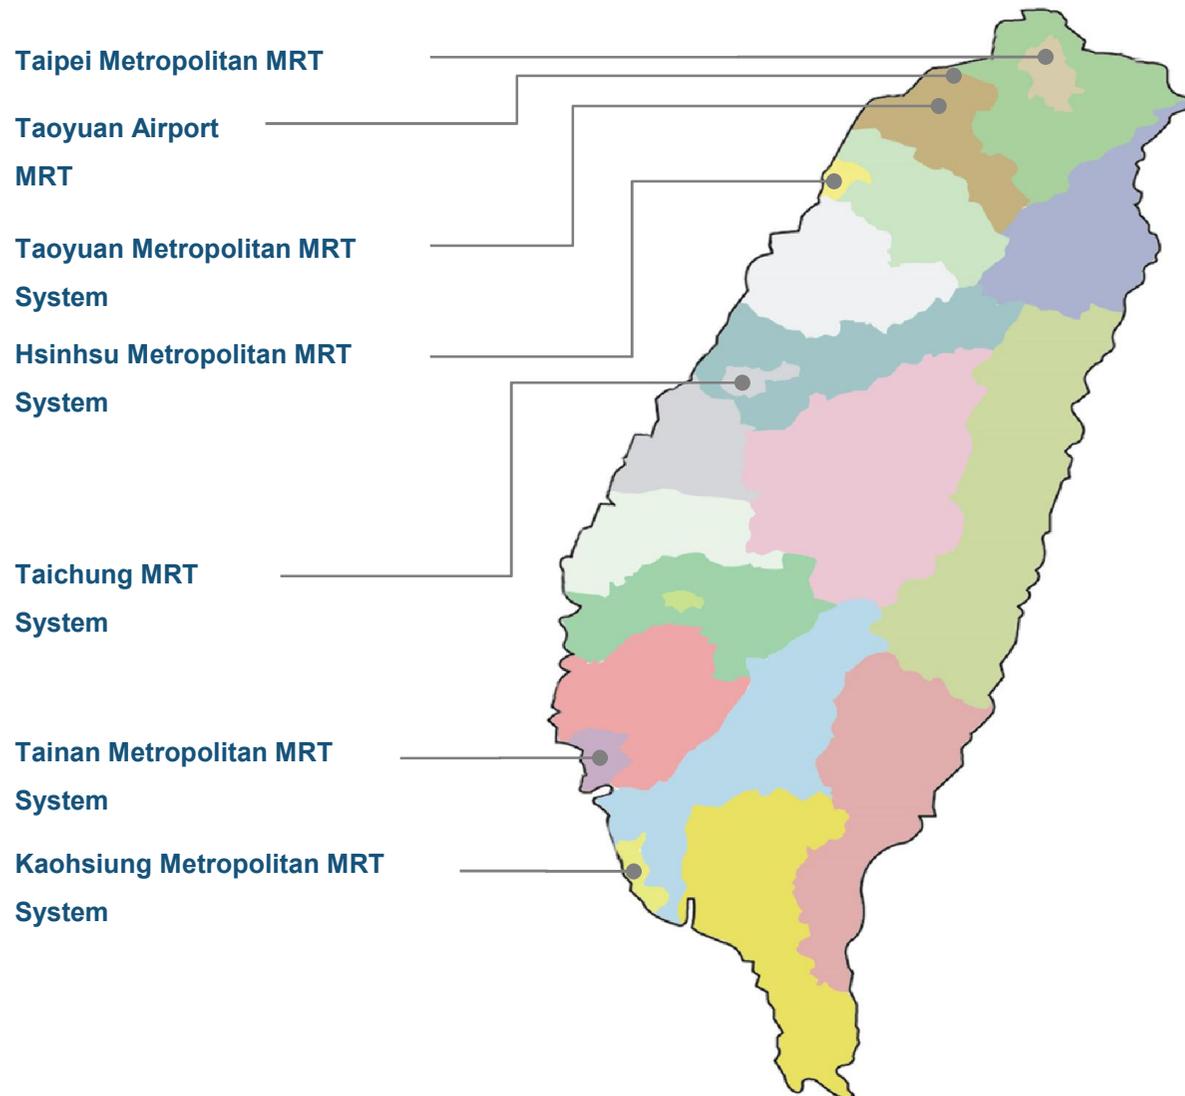

For Investors and Contractors

- Tender Document Preparation: C215, C290, Yunling Station
- Detailed Design: C220, C230, C240, C250, C280, C291, C295, C296, Depot D250
- Contractor's Independent Checking Engineer (CICE): C260, C270, depot D250, Hsinchu station

Others

- Interfacing management, land acquisition, vibration mitigation, environmental monitoring Inspection & maintenance program consultancy

MRT System-Taiwan

Taipei Metropolitan MRT System

- Planning & detailed design, risk management, construction supervision

Taoyuan Airport MRT

- BOT Investment Consultant

Taoyuan Metropolitan MRT System

- PCM & construction supervision

Hsinhsu Metropolitan MRT System

- Planning

Taichung MRT System

- General Consultant(phase1~phase3)

Tainan Metropolitan MRT System

- Feasibility Study and Privatization Study

Kaohsiung Metropolitan MRT System

- General consultant & detailed design

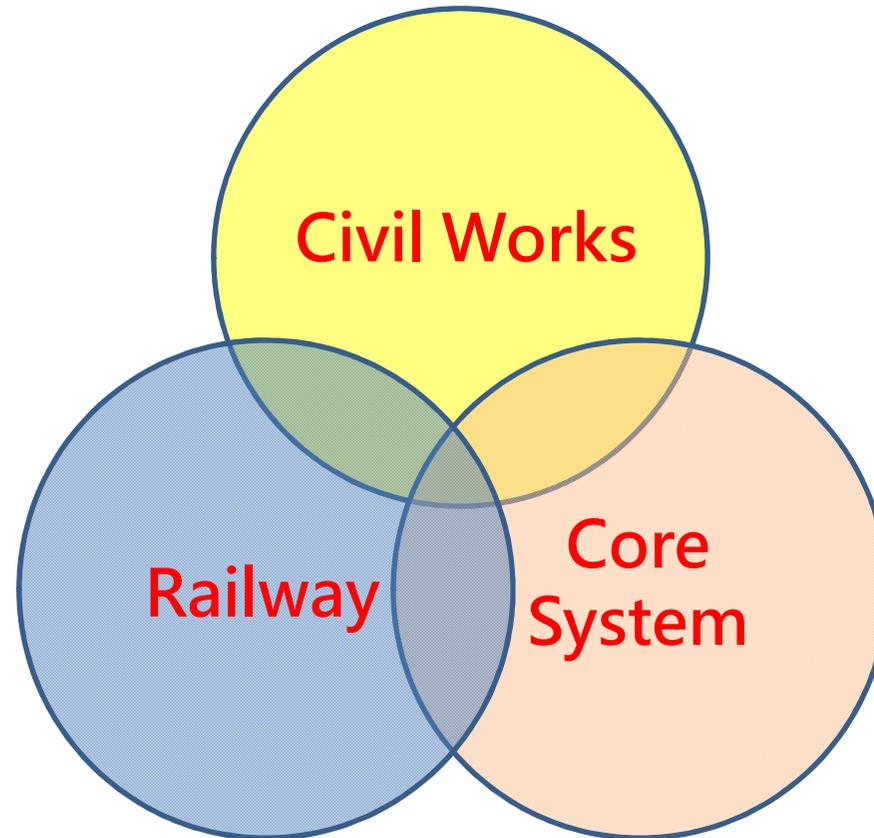

Taipei MRT System- Detailed Design & Construction Supervision

MAA has participated in over 60% of Taipei MRT civil engineering design and consultancy

RailWay Systems

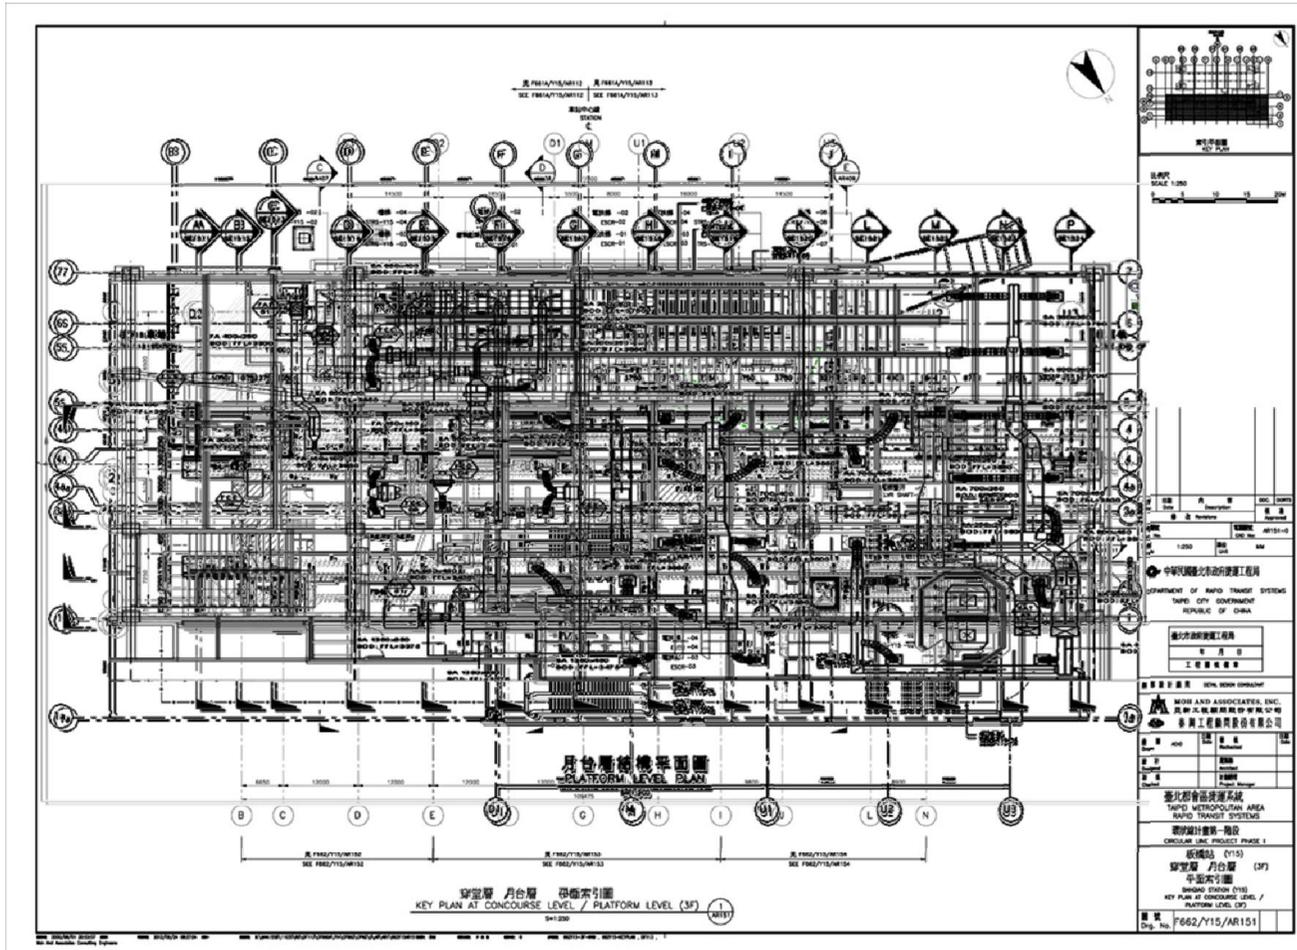

- Architecture
- Structure
- Civil Works
- Underground Facilities
- MEP
- Tracks
- Electrification
- Power Supply
- Communication
- Signaling
- Station facilities
- Depots
- Rolling Stocks

Why BIM?

Information Management

Architecture
Structure
E&M

Design Integration

- 3D visualization of design
- Design synchronization on a same model

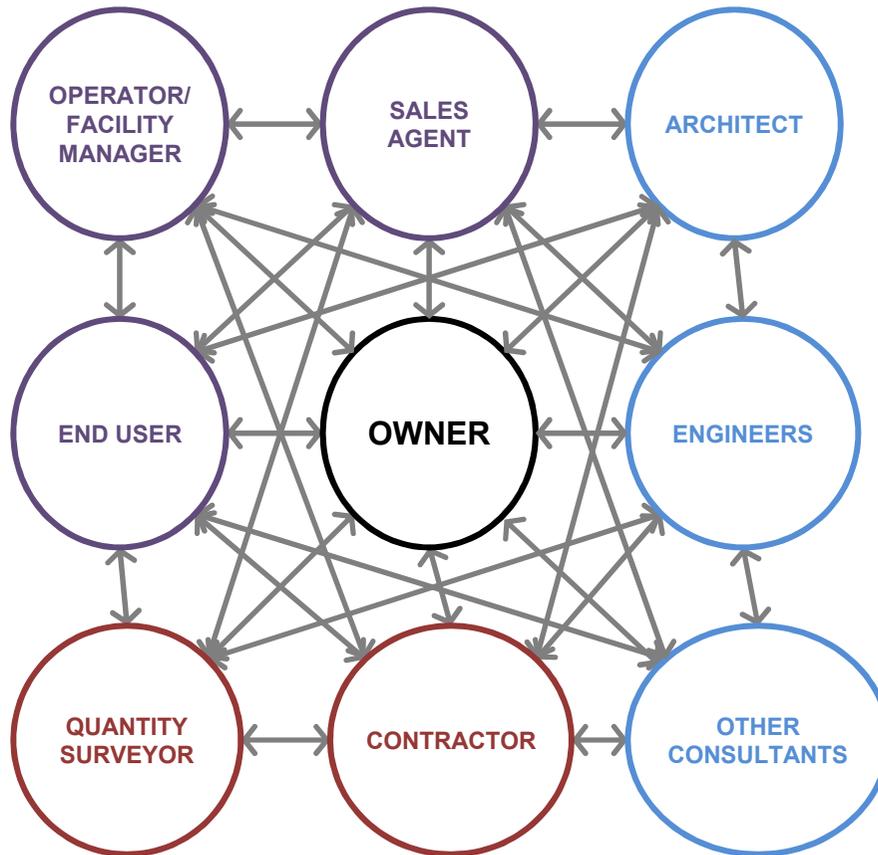

Why BIM?

Information Management

Design
Construction
Operation/Maintenance

Team Management

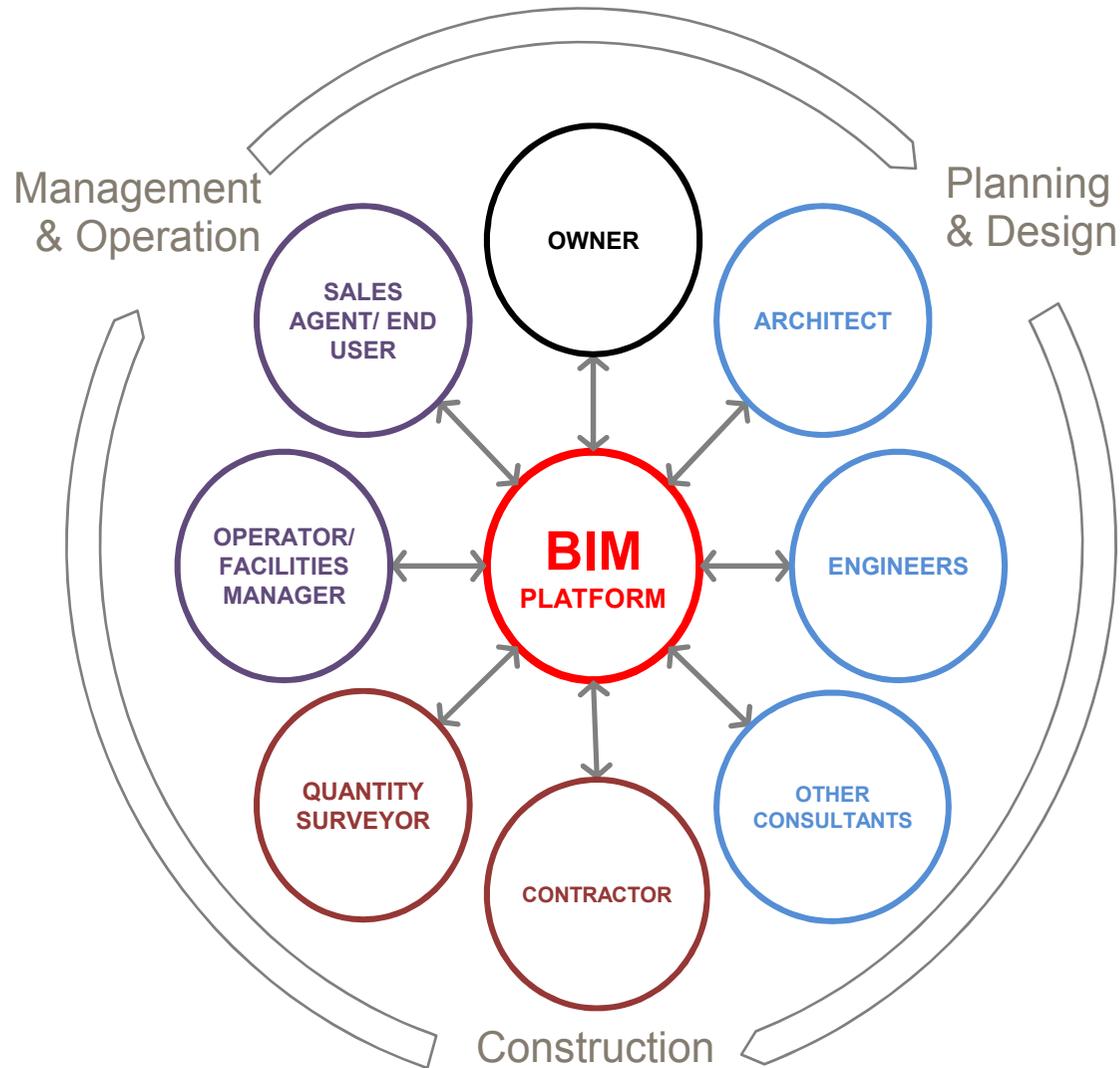

Communication is high
cost and time consuming

Why BIM?

Information Management

Communication Platform

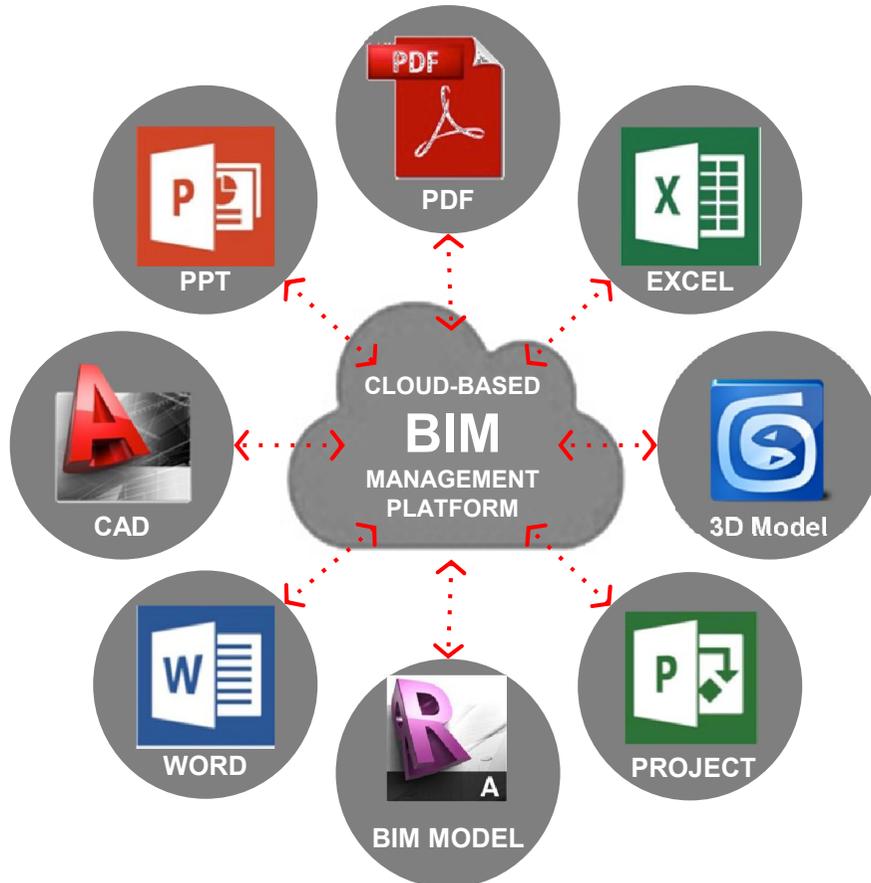

Working Platform

3D model is used as communication interface for client, architect, engineer, and contractor to solve issues more efficiently.

Why BIM?

Information Management

Communication Platform

Seamless Integration

High Efficient Data Synchronization

BIM serves not only a 3D model but also acts as an information management platform. Data with different formats can be synchronized and exchanged through the platform.

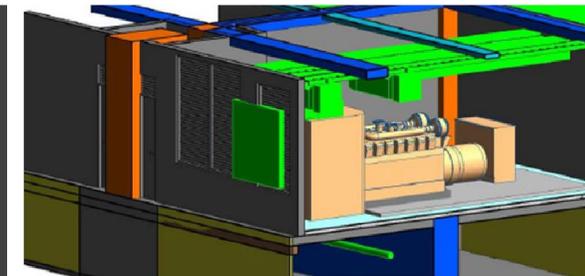

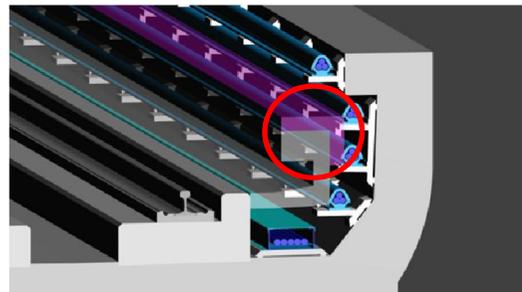

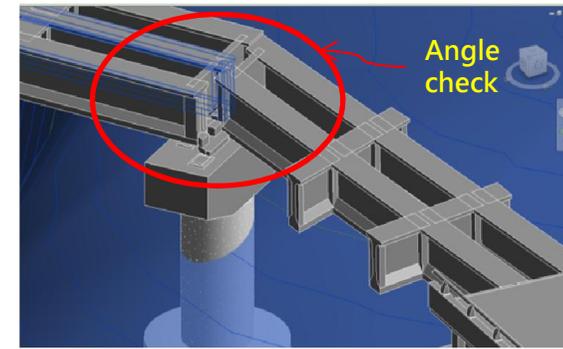

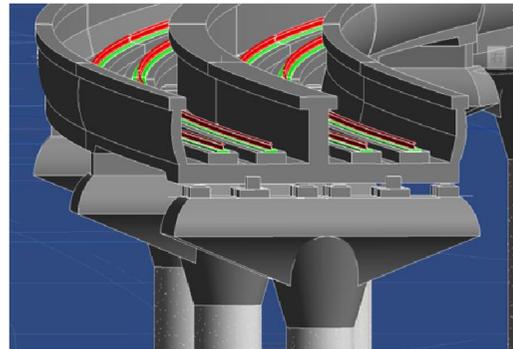

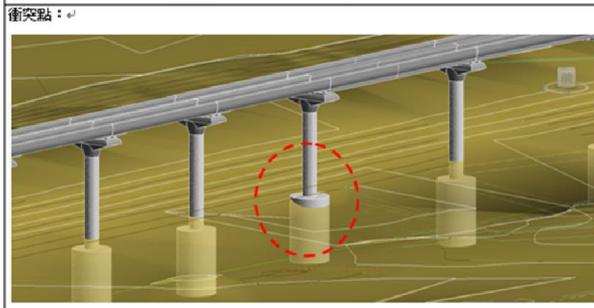

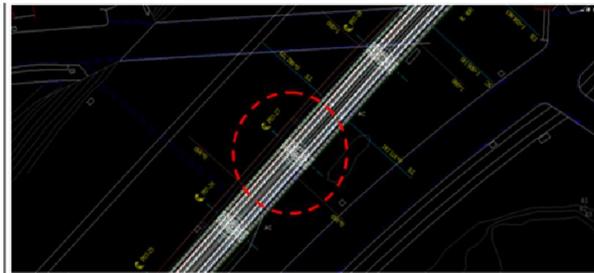

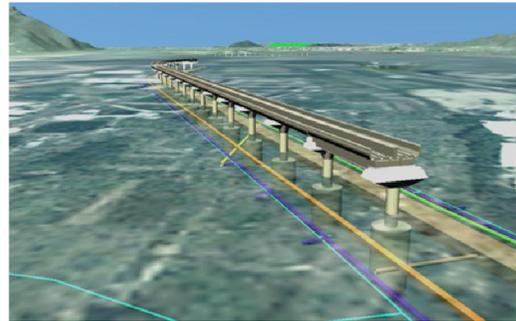

BIM on Rail Engineering Design

BIM Applications

Planning & Design

- Railway alignment & visualization
- Utility conflict detection
- Design facilitation
- Design check
- Clash detection
- 3D CSD/SEM
- Quantity take-off
- 4D construction scheduling
- Integrated construction management

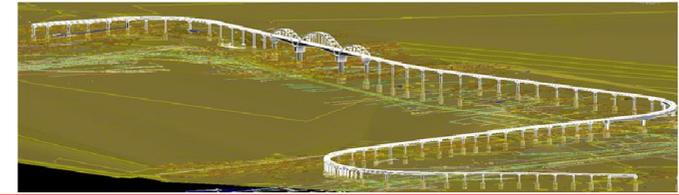

Alignment/Planning

- BIM + DEM + 3D GIS + 3D Model
- Existing Condition
- Master Planning
- Cost Estimating
- Phase Planning / Scheduling

Layout Plan of MRT Line

Alignment/Planning

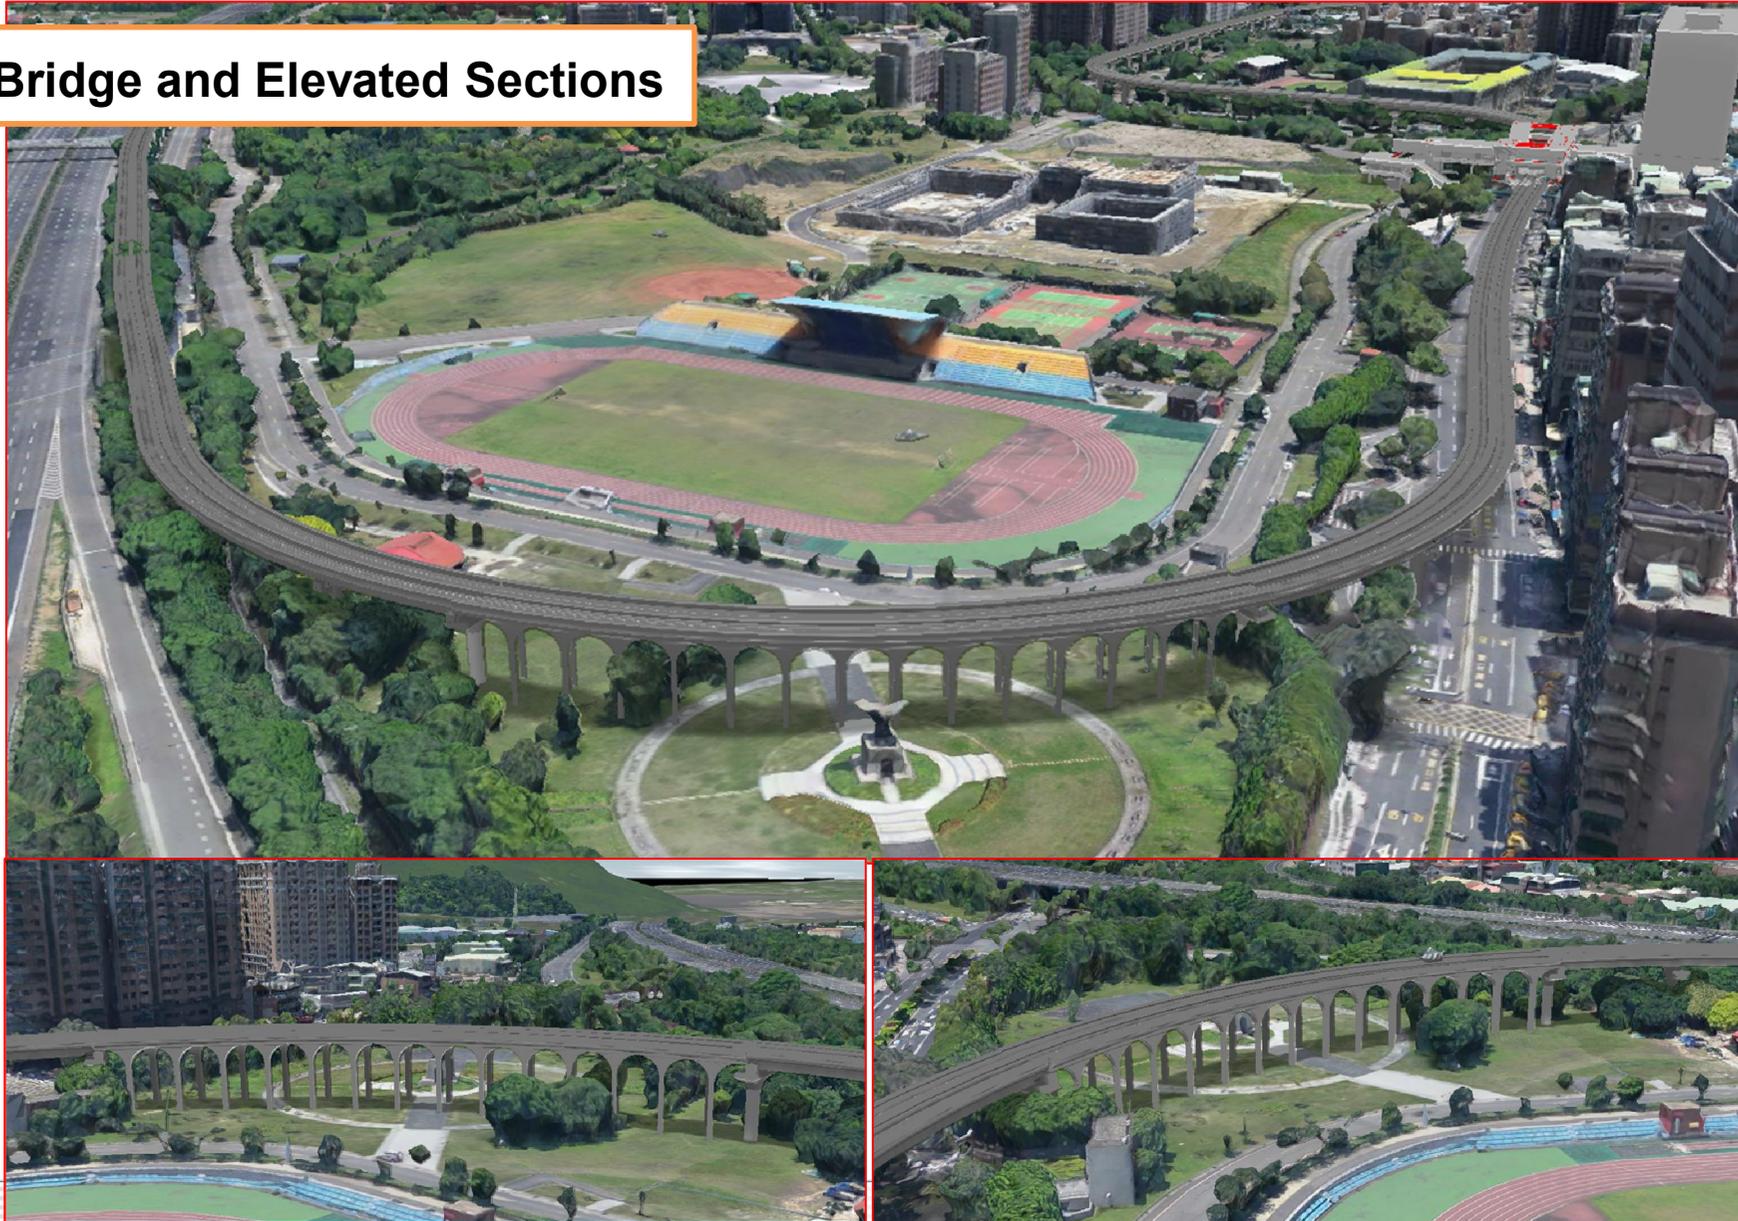

Bridge and Elevated Sections

Alignment/Planning

Bridge and Elevated Sections

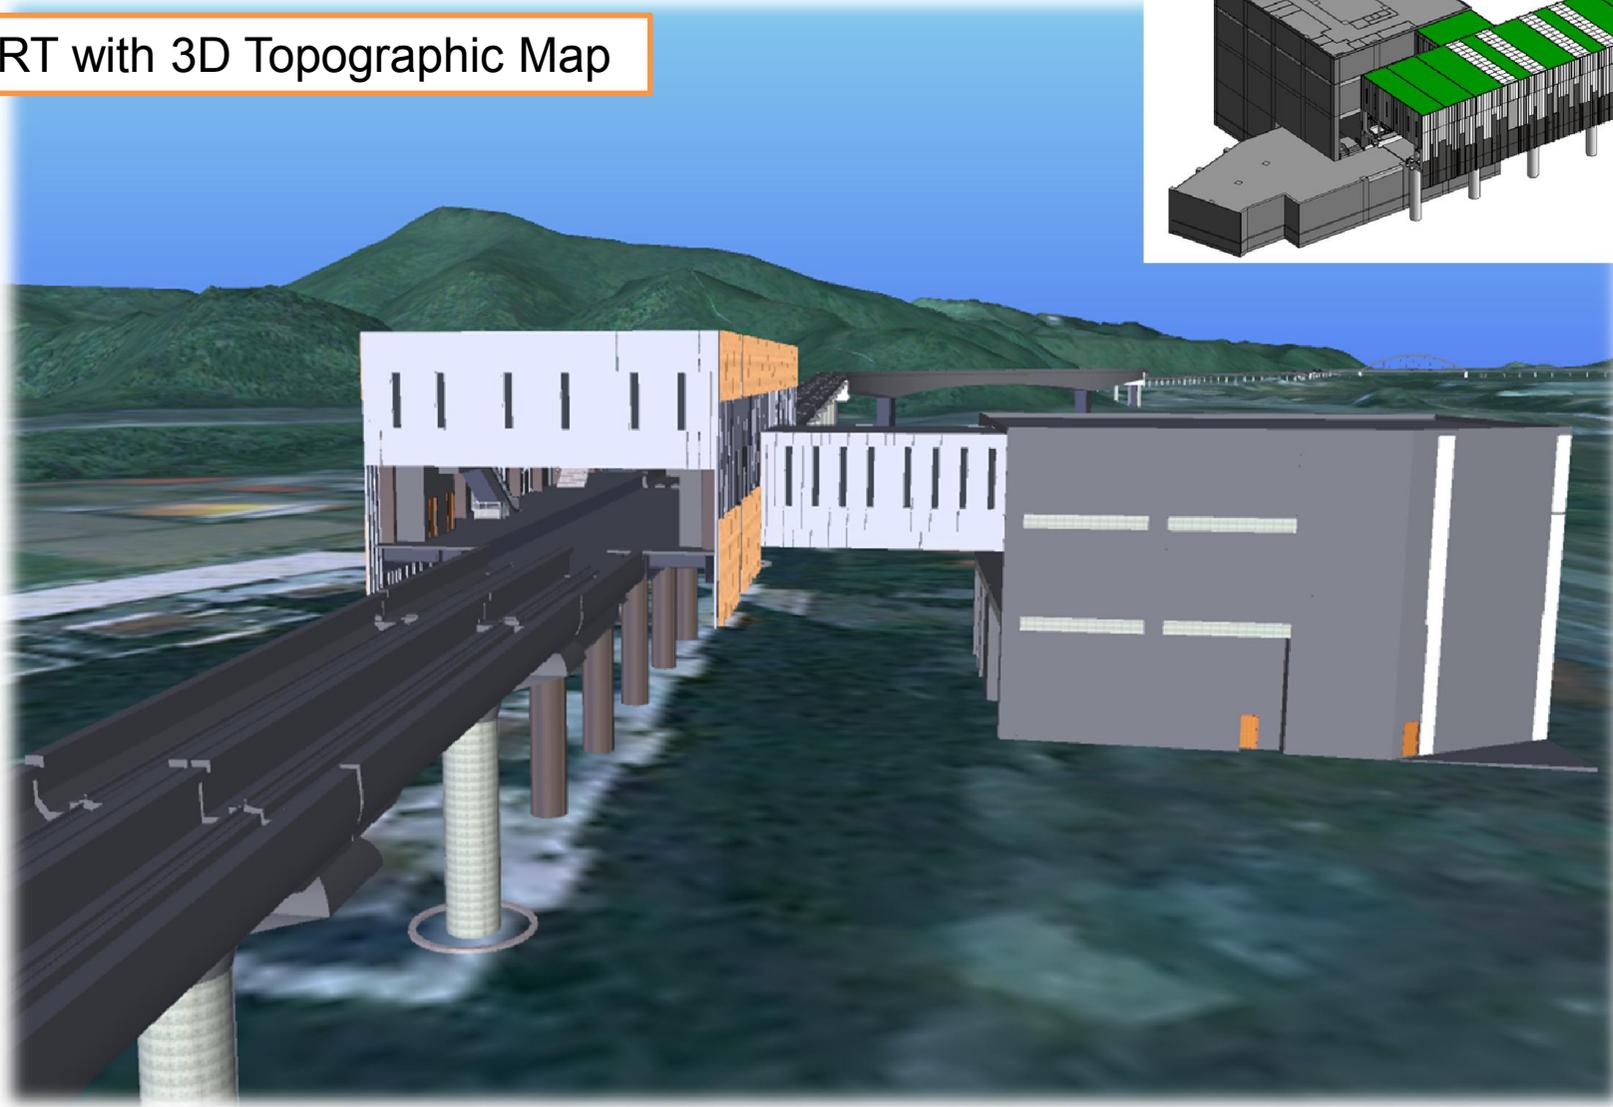

Alignment/Planning

Integrated BIM & 3D Model

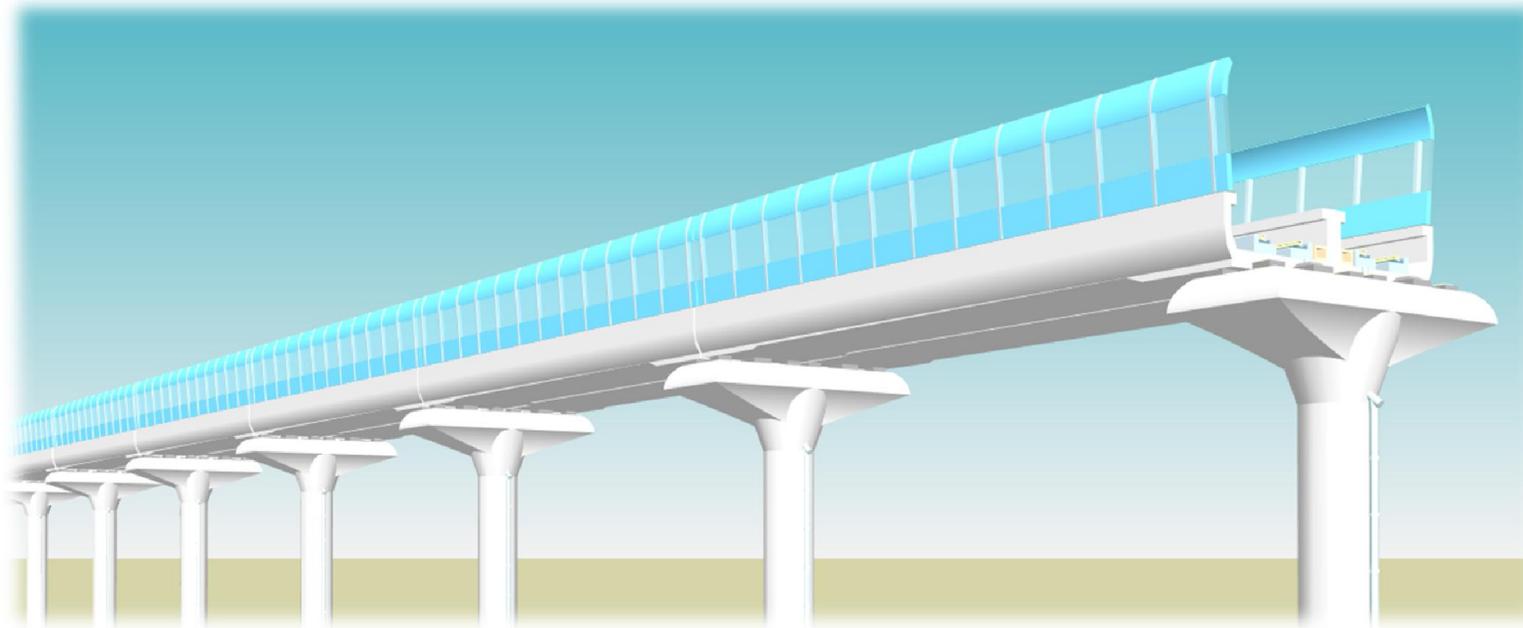

Alignment/Planning

MRT with 3D Topographic Map

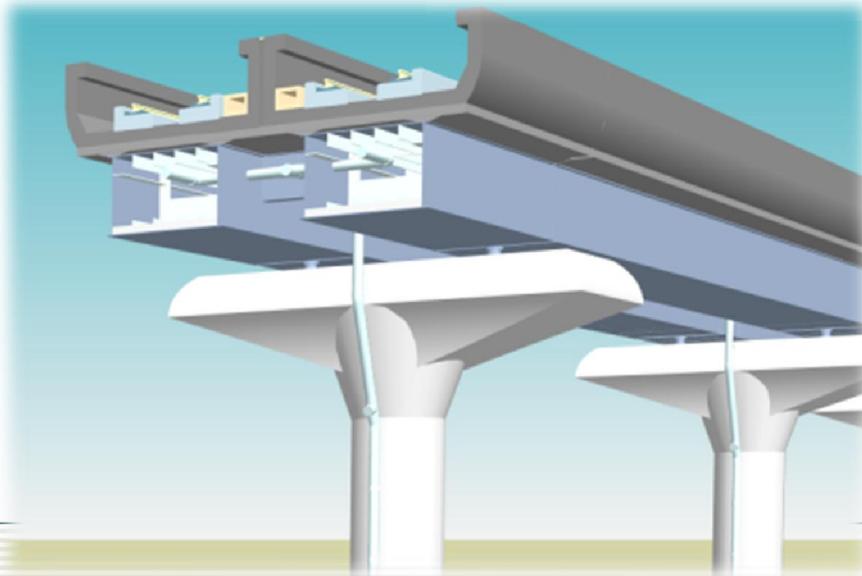

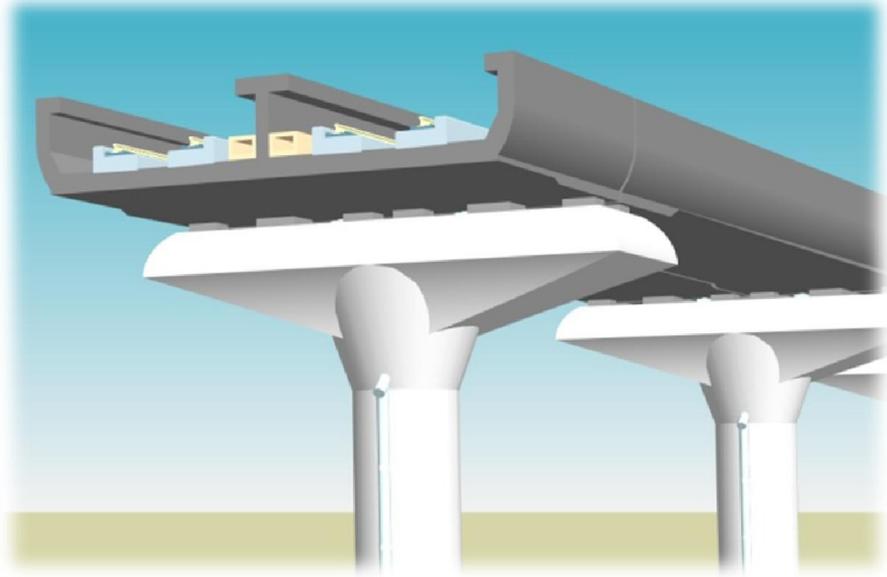

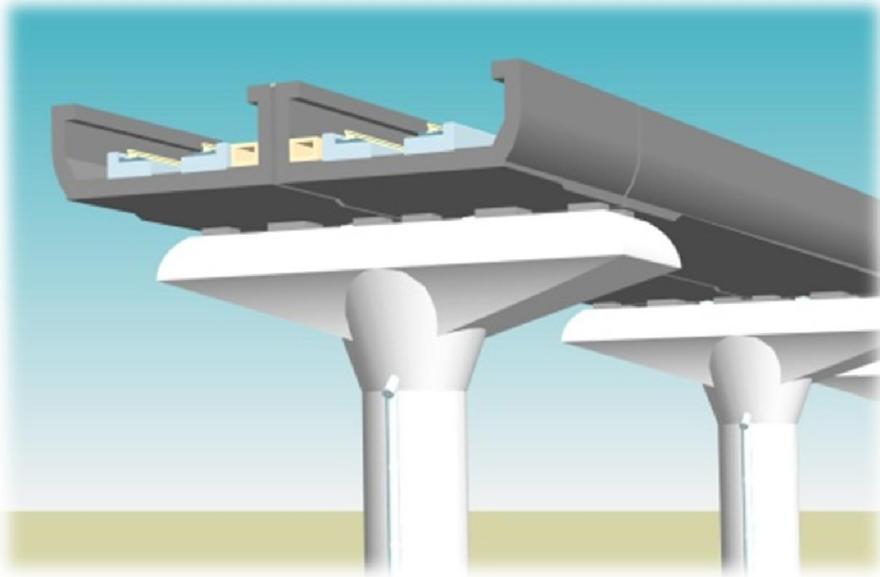

Engineering Design

- Existing Condition
- Design Modeling
- Master Planning
- Cost Estimating
- Phase Planning / Scheduling
- Site Condition
- Alignment Design
- Structure Design
- Daylight Analysis
- Green Building / Sustainability Analysis
- MEP Design
- Core System Design
- Codes / Standards Compliance
- Design Authoring
- Design Review
- 3D Coordination

Quantity Estimates

The screenshot displays the Autodesk Navisworks Manage 2012 interface. The main view shows a 3D architectural model of a building with a balcony. The 'Item Tools' ribbon is active, showing options like Select, Hide, and Properties. The Selection Tree on the left lists various elements, including '7700 x 90+150+30+60 cm' and '900mm Rectangular'. The Properties panel on the right shows details for a selected window element, such as 'Name: 7700 x 90+150+30+60 cm' and 'Material: MaterialOther "Metal-Alumi...".

RAIL BIM EXPERIENCE

CHANGHUA STATION PROJECT TAIWAN HIGH SPEED RAIL

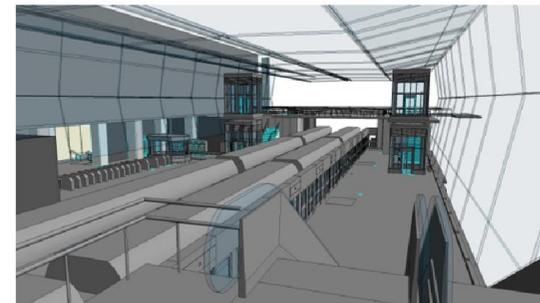

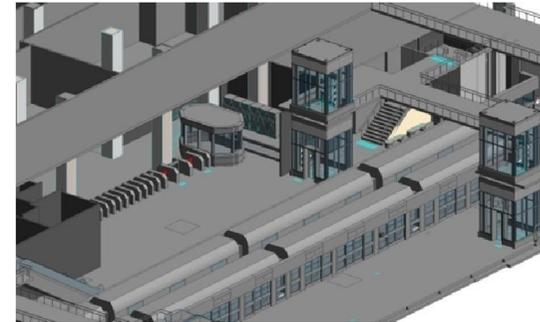

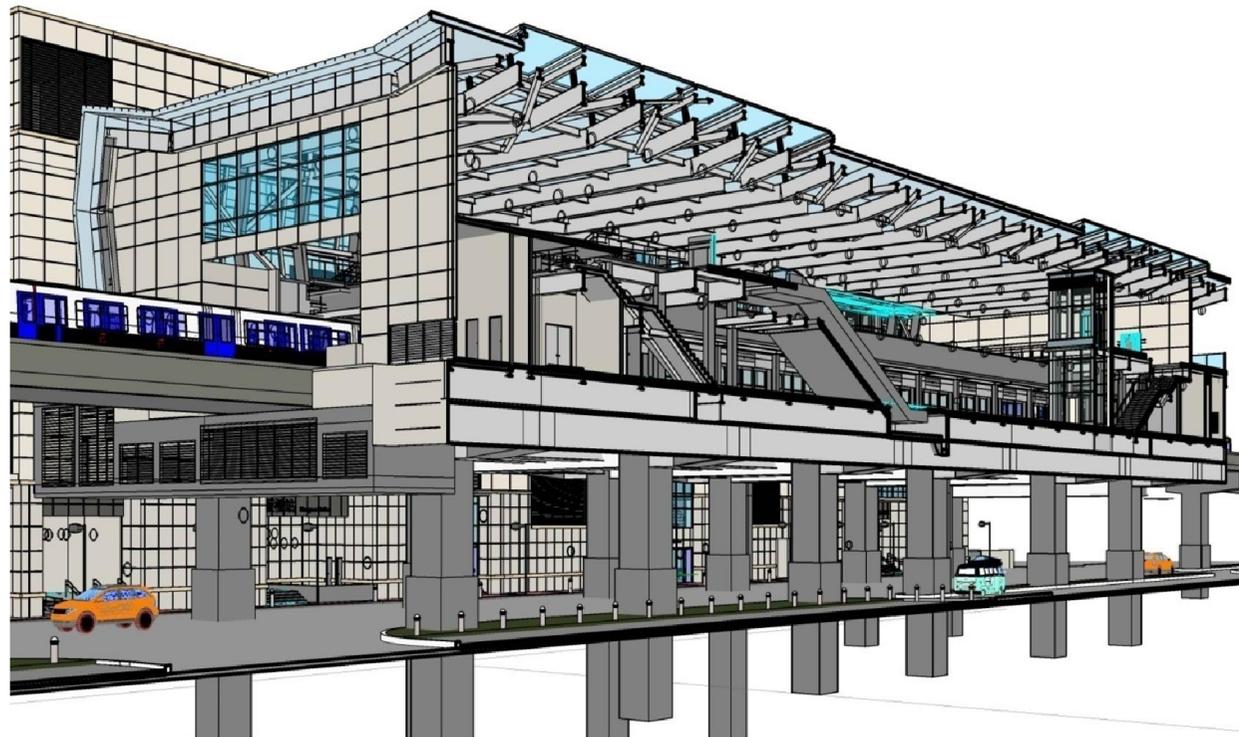

Winners

- Includes two elevated side platforms with station body below.
- BIM Integration and Management Services for the whole station.
- Leading to **20%** cost savings for the client.
- Awards:
 - Autodesk BIM Awards 2015(Hong Kong, Macau and Taiwan)
 - Chinese Institute of Civil and Hydraulic Engineering BIM Awards 2013

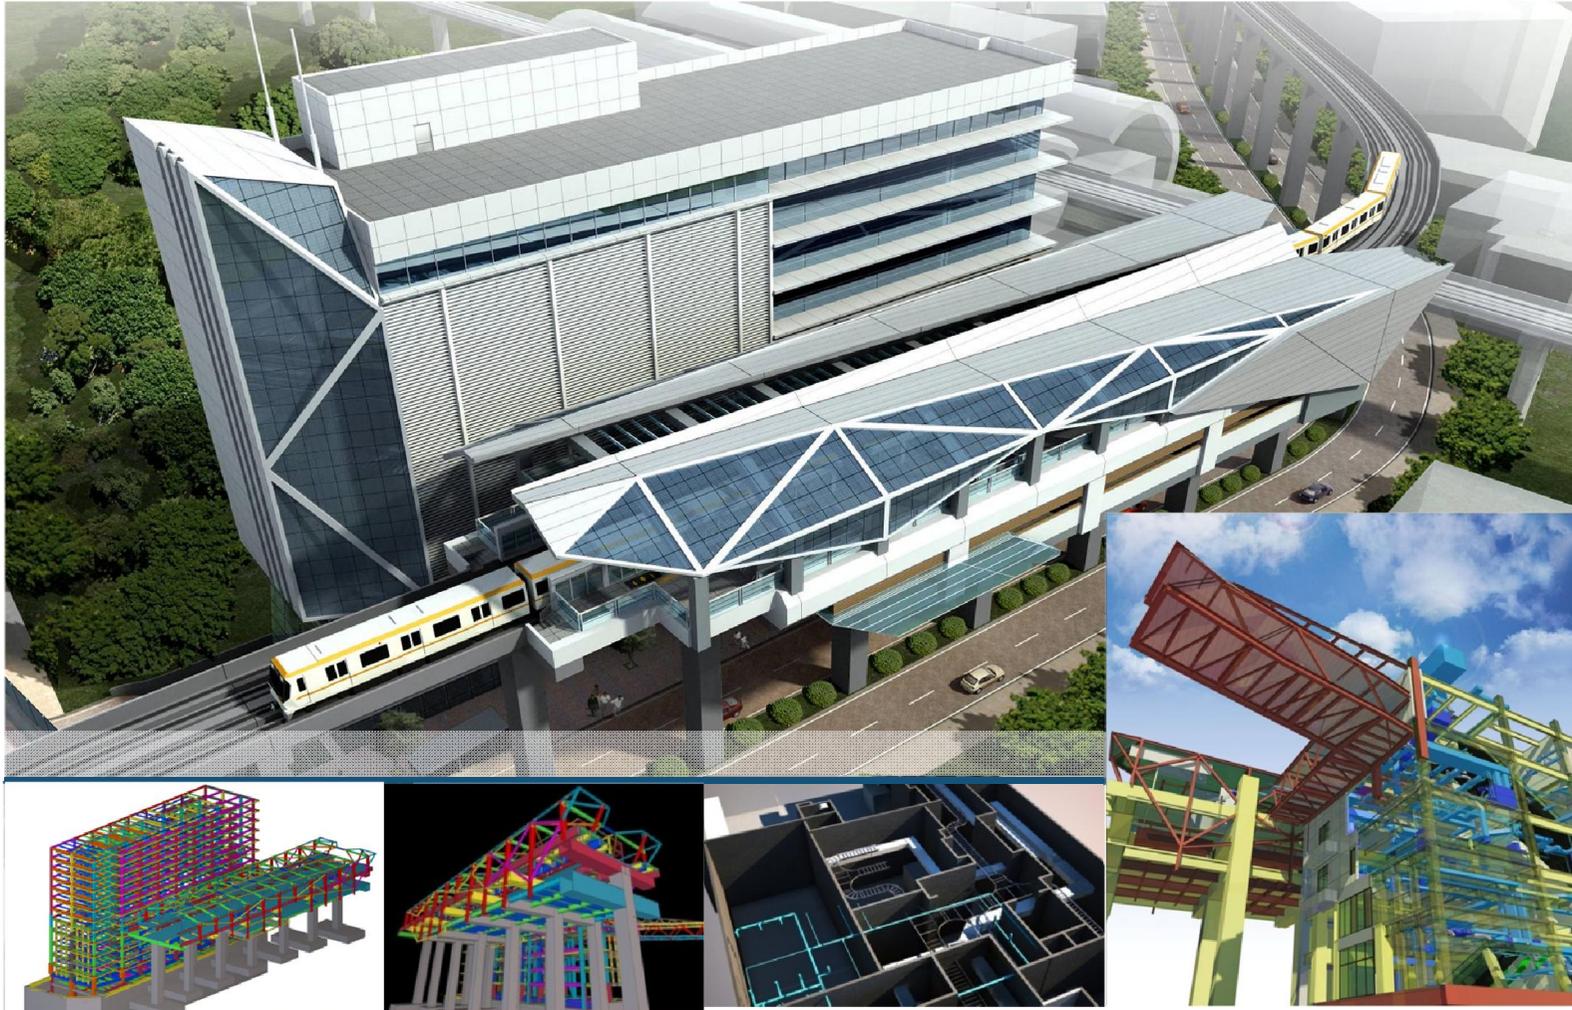

RAIL BIM EXPERIENCE

CIRCLE LINE Y15 STATION-- TAIPEI MRT

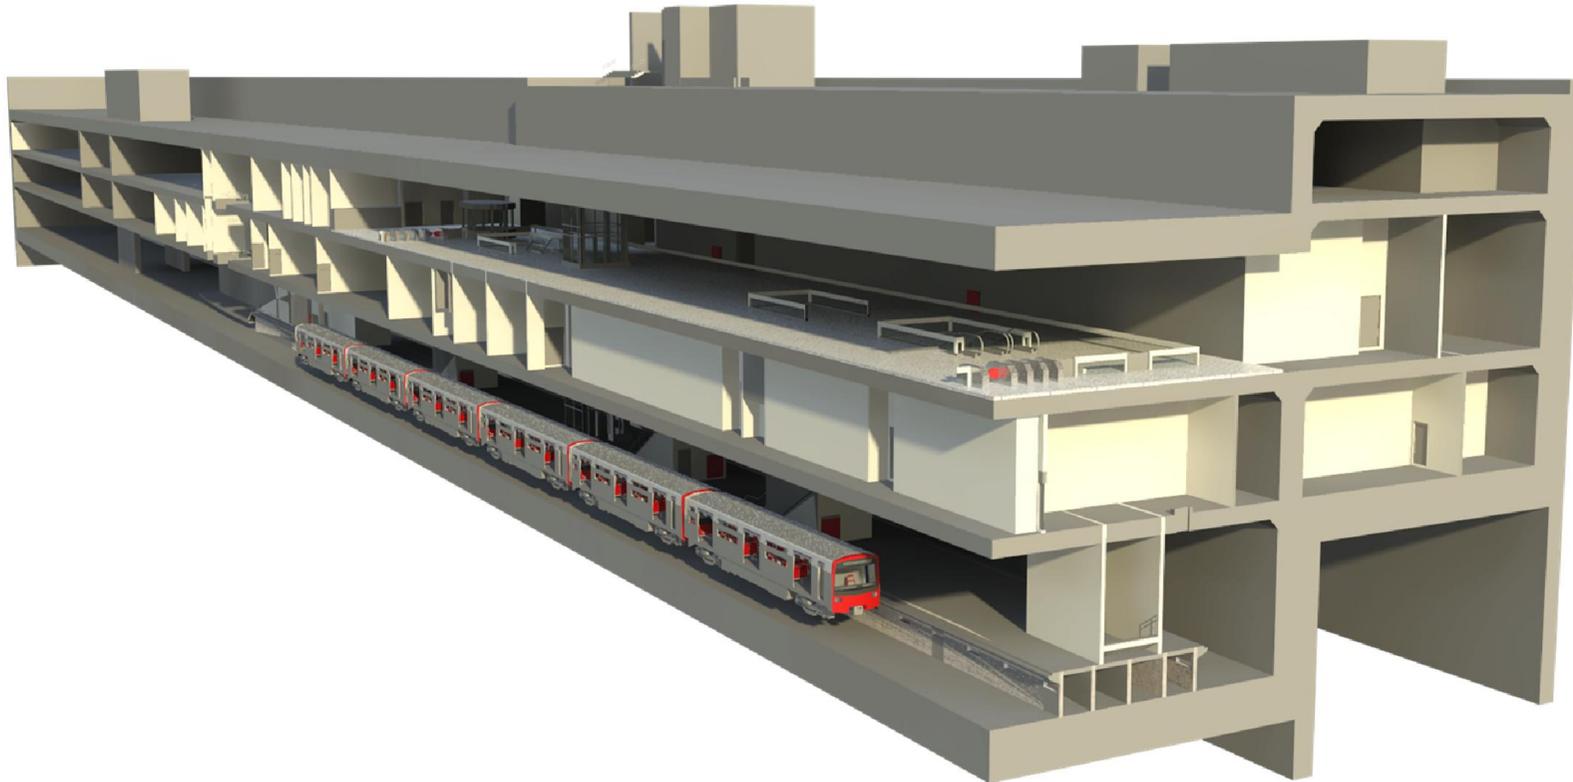

RAIL BIM EXPERIENCE

CIRCLE LINE Y19 STATION-- TAIPEI MRT

RAIL BIM EXPERIENCE

XIN YI LINE EXTENSION PROJECT --TAIPEI MRT

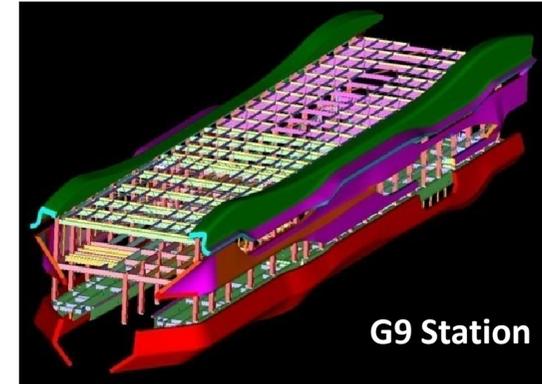

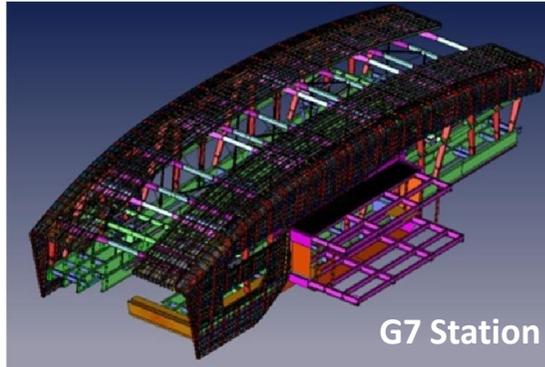

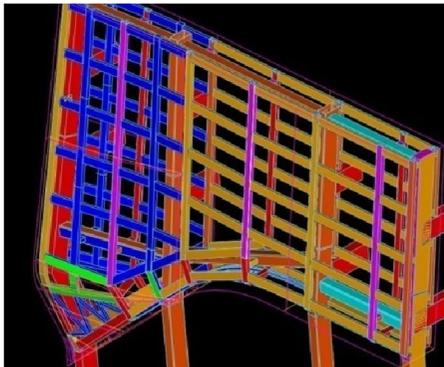

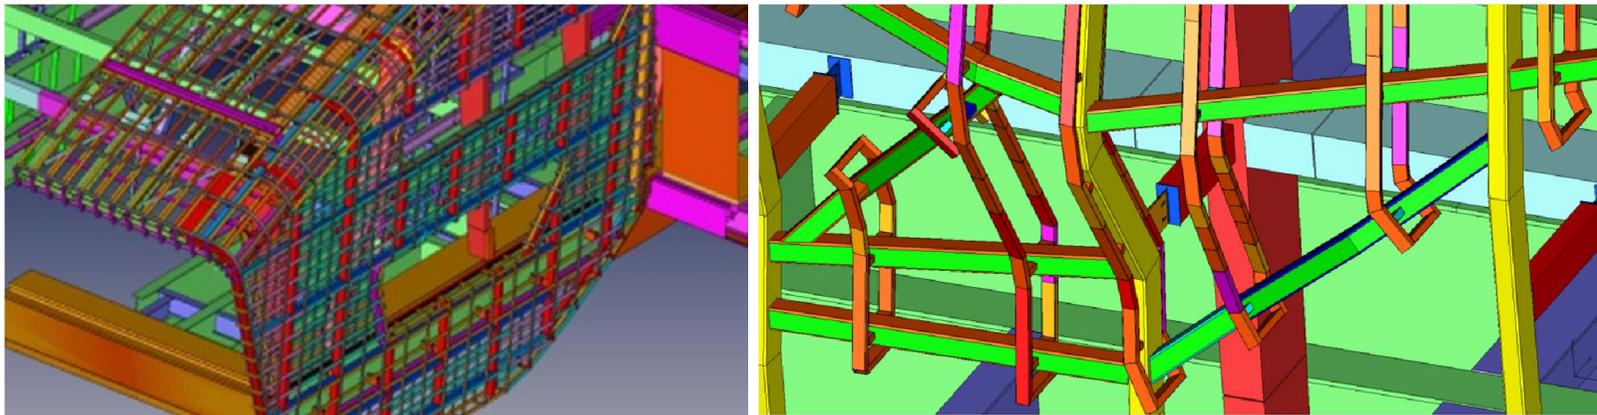

- Two underground stations (named R04 and R03), two sections of shield tunnel.
- Detailed engineering design, including civil, architecture and MEP.
- Provided BIM services for the structure and MEP.

RAIL BIM EXPERIENCE

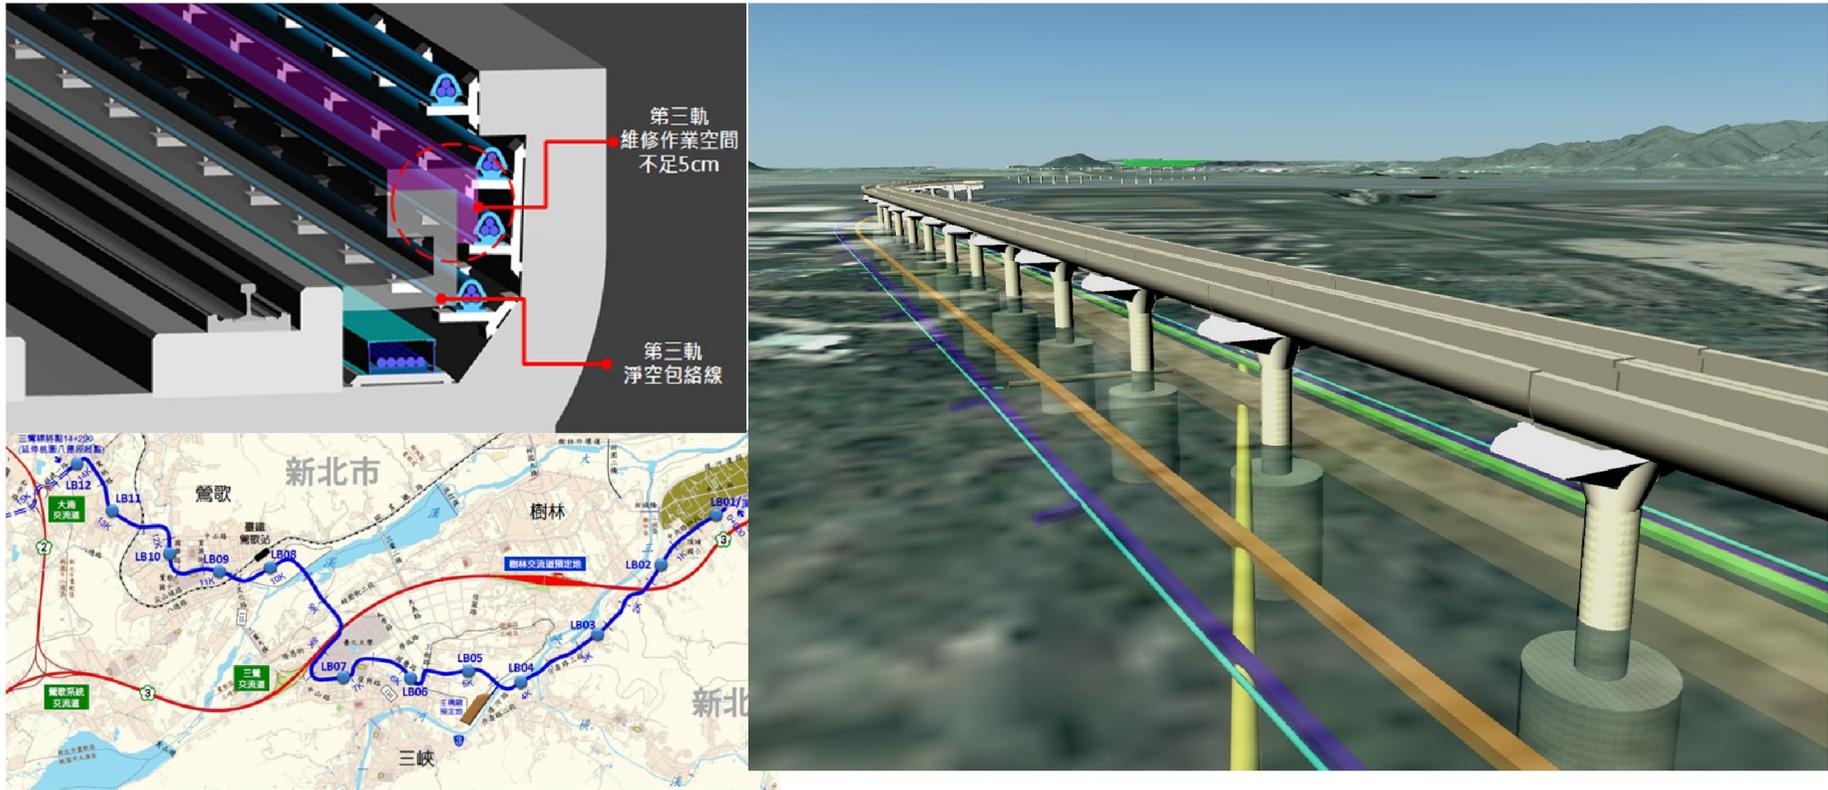

G7/G9 RAIL STATIONS-TAICHUNG MRT

- 3D BIM facade model
- BIM based facade shop drawings
- 3D BIM geometric and curvature rationalization analysis

RAIL BIM EXPERIENCE

SANYIN LINE PROJECT -- TAIPEI MRT

- Totally 14.29 km long MRT system, includes 12 stations and 1 depot.
- Detailed engineering design, including civil, architecture and MEP.
- Provided BIM services for design, construction and maintenance periods.
